

Great Service Has No Shortcuts

**“No shipment is too big
or too complex.”**
– Liz Lasater, CEO
Red Arrow Logistics

When it comes to life sciences, companies have time sensitive needs that make or break the ability to treat a patient, run a hospital or fulfill clinical trial obligations.

Red Arrow Logistics has an excellent track record of moving high value equipment throughout the U.S. and around the world. Our reputation for on-time delivery makes us a valued partner to ensure that your facilities and operations are ready to meet your customers’ needs without interruption. We encourage you to contact us to find out how we may help you handle shipment and logistics for your temperature controlled and perishable items throughout the world.

Our projects with life sciences companies and government agencies have involved air, ocean and ground transportation. Air transportation services for temperature-sensitive pharmaceutical material. Our passive and active solutions are designed for the transportation of pre-packaged shipments to maintain the desired product temperatures.

We have a global platform and network to support emerging markets and working bio-science clusters. Our life sciences customers include pharmaceutical, medical device and diagnostic equipment, life science researchers and manufacturers.
